

EKOKAT

GAME CHANGER

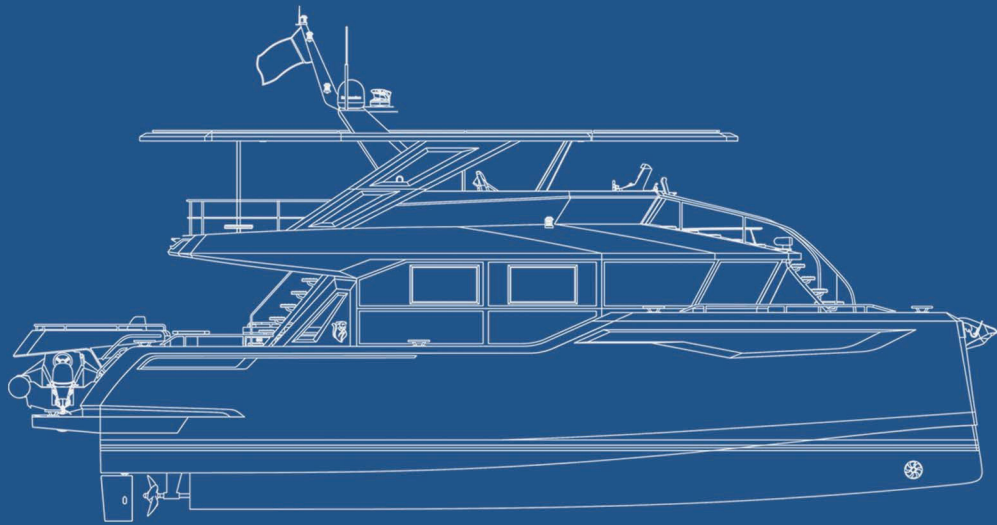

Better perceived as 'match' changing, EkoKat's new hyper breed 58' Voyager power catamaran enters the world stage in 2024. With more of a lions roar than a pussycats meow, EkoKat pushes the boundaries of innovation and excellence to an altogether different and exhilarating level of reality, truly exemplifying the term 'out of the box'

Already being dubbed the Bugatti of the Seas by those privileged to have had a sneak preview, EkoKat have redefined many of the fundamentals in catamaran yachting principles. We can proudly state we have succeeded in creating an illusion that one is onboard a 100ft superyacht with our remarkable and clever use of space.

LOA:	17.8m (58ft)	Overall Height:	8.45m (27.8ft)
Beam:	7.9m(26ft)	Power:	1060HP – 1600HP
Draft:	1.15m (3.8ft)	Cruising Speed:	7-16Knots
LWL:	16.46m (54ft)	Maximum Speed:	18-20 Knots
Displacement	39 tons	Solar Array:	Domestic Power 100kwh

The Voyager 58 Kat simply cannot (and will not!) be compared to other 50-60ft power cats.

It boasts a huge 61sqm luxury Salon, that we have aptly renamed the Luxury Penthouse Apartment and Presidential Suite that is the size of a Sunreef 80 Power (3 x the price of an EkoKat). It has a flybridge *bigger* than a Sunreef 70 Power and bullishly introduces the world's 1st ever Mobile Helm Station MHS™ ~ an incredible innovation that provides full joystick controlled steering for all-speed operation with the soon-to-launch 1st ever autonomous yacht parking by Xenta!

The list of pure excellence and innovation is breathtaking, from cutting edge design to over generous levels of domestic power renewable energy. From seemingly futuristic controls and system technology to an unprecedented level of base price included options including an electric water sports garage and super yacht dumb waiter food elevator.

SPECIFICATIONS

GRP construction EkoKat Voyager 58 – CE Class A construction
Twin Yanmar 6LF530 inboard diesel engines (or 640/800hp options below)
BLUESUN 100kwh lithium battery stacks and retractable hyper solar array for sun worship mode. Solar system is for the yachts domestic power system.
